ABBU BHAKAR SIDDIK

L1 SUPPORT ENGINEER — IT HELPDESK & NETWORK SUPPORT

7022615928 — abbubhakarsiddik19@gmail.com — Koratagere, Karnataka
linkedin.com/in/abbu-bhakar-siddik-42466a3a7 — github.com/AbbuBhakarSiddik

Professional Summary

B.E. Computer Science student with foundational knowledge of networking (TCP/IP, OSI model, DNS, DHCP, VLAN), Windows and Linux troubleshooting, and hands-on problem-solving developed through full-stack software projects. Comfortable working with tickets, remote tools and end users, with a strong ability to diagnose issues methodically and communicate solutions clearly. Certified in Computer Networks (NPTEL). Seeking an L1 Support Engineer role.

Technical Skills

Networking	TCP/IP, DNS, DHCP, VLAN, VPN, OSI Model, Routing basics
Operating Systems	Windows, Linux (basic administration and troubleshooting)
Support Tools	Remote Desktop, MS Office, Google Workspace, Ticketing systems (ServiceNow/Jira - familiar)
Scripting	Python (basics), JavaScript (basics)
Additional Strengths	React.js, REST APIs, MongoDB, Git/GitHub

Technical Support Experience

Independent IT & Network Troubleshooting Support *Ongoing*

- Diagnosed and resolved PC hardware, software and home network issues for family and friends, including Wi-Fi setup, router configuration and driver/connectivity problems.
- Walked non-technical users through step-by-step fixes over calls and in person, simplifying technical concepts.
- Identified root causes of recurring issues rather than applying one-off fixes.

Education

Bachelor of Engineering — Computer Science (Lateral Entry) *Sep 2024 – Present*
Shridevi Institute of Engineering and Technology — SGPA: 7, 7, 8 (no active backlogs)

Diploma — Computer Science & Engineering *Nov 2021 – Mar 2024*
H.M.S Polytechnic, Tumkur — Above 8.0 SGPA every semester

Certifications

- Computer Networks — NPTEL
- Building LLM Applications with Prompt Engineering — NVIDIA (Sep 2025 – Nov 2025)
- Software Engineering Job Simulation — JPMorgan Chase via Forage (2026)

Projects

NextPath AI — Full Stack Developer *Jun 2025 – Oct 2025*

- Built and deployed a full-stack platform end-to-end, debugging across frontend, backend and API layers.
- Implemented authentication and modular services, requiring careful configuration and systematic issue isolation.

VendorAX — Full Stack Developer *2026*

- Designed a multi-role system with real-time notifications (Socket.io) and resolved integration issues involving payments, media and live data sync.

Strengths

Problem-solving · Clear and patient communication · Quick learner · Teamwork and ownership
