ABBU BHAKAR SIDDIK

L2 SUPPORT ENGINEER

7022615928 — abbubhakarsiddik19@gmail.com — Koratagere, Karnataka
linkedin.com/in/abbu-bhakar-siddik-42466a3a7 — github.com/AbbuBhakarSiddik

Professional Summary

Computer Science engineering student with a full-stack development background and NPTEL-certified knowledge of Computer Networks. Experienced in debugging across frontend, backend, API and database layers, and in diagnosing PC and network issues for end users. Strong root-cause analysis, clear technical communication, and a structured approach to escalation. Seeking an L2 Support Engineer role to resolve escalated technical incidents and improve recurring issues.

Technical Skills

Networking	TCP/IP, OSI Model, DNS, DHCP, VLAN, VPN, Routing basics
Operating Systems	Windows, Linux (basic administration and troubleshooting)
Application & Backend	REST APIs, Node.js, Express.js, JWT authentication, Socket.io
Databases	MongoDB, Mongoose
Troubleshooting	Root-cause analysis, log-based debugging, ping, tracert, ipconfig, nslookup, Task Manager
Scripting	Python (basics), JavaScript (basics)
Tools	Git, GitHub, Remote Desktop, Ticketing systems (ServiceNow/Jira - familiar), MS Office

Technical Support Experience

Independent IT & Network Troubleshooting Support *Ongoing*

- Diagnosed and resolved PC hardware, software, driver and network issues, including Wi-Fi and router configuration problems.
- Isolated faults step by step and traced recurring problems to their root cause instead of applying one-off fixes.
- Guided non-technical users through fixes over calls and in person, explaining technical issues in simple terms.

Projects

NextPath AI — Full Stack Developer *Jun 2025 – Oct 2025*

- Built and deployed an AI-powered career guidance platform (React, Node.js, Express, MongoDB) with LLM API integration.
- Debugged issues across frontend, REST API and database layers; implemented JWT authentication and modular services.

VendorAX — Multi-Vendor Marketplace *2026*

- Developed a multi-role system (Seller / Buyer / Admin) with role-based access control, Razorpay payments and Cloudinary media.
- Resolved integration issues across payments, media and real-time (Socket.io) data flows.

Education

Bachelor of Engineering — Computer Science (Lateral Entry) *Sep 2024 – Present*
Shridevi Institute of Engineering and Technology — SGPA: 7, 7, 8 (no active backlogs)

Diploma — Computer Science & Engineering *Nov 2021 – Mar 2024*
H.M.S Polytechnic, Tumkur — Above 8.0 SGPA every semester

Certifications

- Computer Networks — NPTEL
- Building LLM Applications with Prompt Engineering — NVIDIA (2025)
- Software Engineering Job Simulation — JPMorgan Chase via Forage (2026)
